Frontend Developer with 5+ years of experience specializing in building complex CRM systems and user interfaces using Vue.js. Designed application architecture and developed projects from scratch, successfully refactored legacy codebases by migrating to modern technologies (Vue 3, TypeScript, Composition API).

- 5+ years of experience in frontend development, core stack: Vue.js (2/3), Angular, Typescript
- Designed and developed CRM systems and internal portals from scratch
- Refactored and maintained legacy projects, migrated to TypeScript and Composition API
- Hands-on experience with React.js and basic understanding of Angular
- Experience working with REST APIs, integrations, and performance optimization

Experience

Frontend Developer

Shymkent Apr. 2023 - Jun. 2026

Evrika Company

- Migrated the broker project to Vue 3, improving performance and maintainability.
- Refactored and maintained a customer survey platform.
- Developed a WebView application for QR code generation and payment integration.
- Designed and built an **Inventory system** from scratch, enabling the company to replace the third-party ABM Inventory solution and reduce costs.
- Developed a POS (cash register) application for retail stores with integration of payment terminals and printing devices (receipts, invoices).
- Tech stack: **Vue.js 3, TypeScript, Composition API, Quasar UI, Pinia, Angular.**

Frontend Developer

Astana (remotely) Jan. 2023 - Jun. 2024

Geometry

- Developed a **CRM system** for project and team management, including project scheduling, client and lead management, reference data, and notes.
- Built a **mobile application** using Ionic + Vue for clients to access financial reports, track cash flow (incomes and expenses).

Frontend Developer

Shymkent Aug. 2021 - Nov. 2022

Intertor

- Acted as the sole Frontend Developer in the team, responsible for the full cycle of interface development for 3 client projects (portals and CRM systems).
- Designed and implemented a UI kit based on Quasar UI with 30+ reusable components, reducing the development time for new pages by 40%.
- Successfully delivered 2 large-scale client projects, ensuring high-quality and performant user interfaces, which received positive client feedback.

Frontend Developer

Astana Jun. 2020 - Jul. 2021

Geometry

- Developed and maintained the frontend of 3+ corporate websites and internal portals using Vue.js 2 and Vuex.
- Implemented responsive design across all projects, ensuring proper display on mobile devices and tablets, which increased mobile traffic (~15%).
- Collaborated with backend developers to integrate REST APIs and display dynamic data.

Education

Shymkent 2017-2021

Central Asian Innovative University — Bachelor of Engineering and Technology, *Computer Science and Engineering*

Courses & Certifications

- React.js — Rs School
- Angular — Rs School
- React.js — Coding Addict
- Vue.js — Vue School

Skills

Languages: JavaScript, TypeScript

Tools: Webpack, Vite, Axios, TanStack, Jest, Cypress, GitHub Actions, TailwindCSS, SASS

Frameworks/Libraries: React, Redux, Vue, Pinia,, Quasar UI, Angular, Ant-Design, Material UI.

Concepts: Performance Optimization, UI/UX Design, Micro Frontends, Testing, CI/CD, SPA, PWA, RESTful APIs, Agile/Scrum, SSR.

Language Skills: English B2, Russian native.
